

The Pre-College Initiative Program is the focus of the National Society of Black Engineers' effort to promote college, academics, technology, and leadership to pre-college students. Our primary focus is to encourage students in grades 6 – 12 to develop interest and skills in math and science. The program is open and available to ANY student with an interest in engineering, science, math and technology.

The National Society of Black Engineers' Pre-College Initiative program will lead the world in enhancing the pre-college students' Academic, Technical, and Leadership skills in order to maximize their success in life.

NSBE

Pre-College Initiative

Frederick, MD NSBE Jr

Helping future engineers develop and master their science, technology, engineering and mathematical skills

Excel Academically:

- MATHCOUNTS
- Try-Math-A-Lon (TMAL): "Jeopardy"-style math competition
- Model Rocketry Competition
- Participation in local and regional STEM-related competitions
- TEAMS Competition

Succeed Professionally:

- Annual Scholarship & Awards Banquet
- SAT/ACT assistance
- Mentoring and tutoring
- College admission preparation
- PCI Mini Conferences (Engineering and Professional Development

Positively Impact the Community:

- Community STEM Awareness Programs
- Frederick In the Streets
- STEM Day
- Box Tops for Education collected to support local elementary school
- Near-Peer Tutoring
